

POW-R MOLE

TRENCHLESS SOLUTIONS

PORTABLE POWER UNIT

THE “PORTABLE POWER UNIT” is a professionally engineered and field tested power unit that was designed to be a solution for those who don't want to tie up a piece of excavation equipment to run the hydraulics of Pow-r Mole equipment and can concentrate on using their excavators for other areas of the job. Also this unit is easy to move around and get into areas where space is limited. Can also have an auxillary tool circuit added and use this unit to run other hydraulic tooling.

PORTABLE POWER UNIT

PORTABLE POWER UNIT

Unit Dimensions

Height	36 inches
Length	40 inches
Width	30 inches
Weight	430 pounds

Capability

Max. Working Pressure	3,000 PSI
Flow Rate	20 GPM

Operating Features

Pressure compensating piston pump

20HP, two cylinder industrial/commercial Honda engine with electric key start

10 micron hydraulic filtration

10 gallon frame hydraulic reservoir

6.5 gallon fuel tank

Pressure bypass valve for easy start

Single station control for ease of use.

System pressure gauge

Hydraulic oil cooler

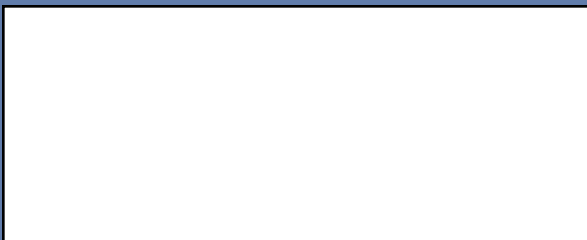

Fold down handles for easy storage

OPTIONAL FEATURE

Auxillary tool circuit
